Safety Precautions

Before getting started, read the following important cautions.

- 1. Be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and place all electronic components in any static-shielded devices. Most electronic components are sensitive to static electrical charge.
- 2. Disconnect the power cords from the GOT715S Series before making any installation. Be sure both the system and the external devices are turned OFF. Sudden surge of power could ruin sensitive components. Make sure the GOT715S Series is properly grounded.
- 3. Do not open the system's top cover. If opening the cover for maintenance is a must, only a trained technician is allowed to do so. Integrated circuits on computer boards are sensitive to static electricity. To avoid damaging chips from electrostatic discharge, observe the following precautions:
 - Before handling a board or integrated circuit, touch an unpainted portion of the system unit chassis for a few seconds. This will help to discharge any static electricity on your body.
 - When handling boards and components, wear a wrist-grounding strap, available from most electronic component stores.

Section 1 Introduction

This chapter contains general information and detailed specifications of the GOT715S-RA-M. Chapter 1 includes the following sections:

- General Description
- Specification
- Dimensions
- I/O Outlets
- Package List

1.1 General Description

GOT715S-RA-M is utilized to keep the train driver informed about the status of the train's status. Its design allows it to be deployed in environment with an extended temperature (-25°C~70°C) and it also complies with the EMC, shock and vibration test requirements of European standard EN 50155 for railway applications. GOT715S-RA-M is equipped with 15" TFT ruggedized touch panel computer and all lockable connectors are perfect choice for Human Machine Interface (HMI) in railway environments. The 15" railway touch panel PC includes a comprehensive feature set with one CAN Bus, DIO, audio, two Ethernet ports, USB ports and RS-232/422/485.

Railway application-EN 50155 certificated

The Railway power module design supports 20ms interruption, EMI EN 55022 CLASS A filter, and over/short current protection.

Sunlight readable design

Its sunlight readable technology with LED tech high brightness 800 nits color display allows the screen legible even under strong sunlight.

Powerful computing: Intel® Atom Bay Trail processor

GOT715S-RA-M features an Intel[®] Atom processor that offers reliable and stable performance in harsh environment.

1.2 Specifications

Main CPU Board

- CPU
 - Intel[®] Atom[™] E3845 1.91GHz processor onboard
- System Memory
 DDR3L 4 GB onboard
- BIOS
 - America Megatrends Inc BIOS

I/O System

- Standard I/O
 - 2 x RS-232/422/485 with isolated 1.5KV (M12, A-coded)
 - 2 x Gigabit LAN with isolated 1.5KV (M12, X-coded)
 - 2 x USB 2.0 (M12, A-coded)
 - 1 x DIO (6 input/2 output) with isolated 1.5KV (Phoenix type)
 - 1 x CAN Bus with isolated 1.5KV (D-sub)
- Audio
 - 1 x Audio: Line-in, & Mic-in, Speaker-out or Line-out (D-sub)
- Expansion
 - 2 x PCIe Mini Card slots (slot 2 for mSATA use only)
- Storage
 - 16 GB flash onboard
- Power connector
 - 1 x DC for power input with isolated 1.5KV (M12, A-coded)

System Specification

- 15" XGA (1024 X 768) LCD
- 5-wire resistive Touch
- IP65 aluminum front bezel
- Net Weight
 - 4.03 Kg
- Dimension (Main Body Size)
 - 400(W)*300(H)*61.5(D)
- Operation Temperature
 - -25°C to 70°C
- Relative Humidity
 - 10% to 95% @ 40°C, Non-Condensing
- Power Input
 - 24V to 110VDC, 20ms interruption hold up (EN 50155 Class S3)

1.3 Dimensions and Outlines

The following diagrams show the dimensions and outlines of GOT715S-RA-M.

1.4 I/O Outlets

Please refer to the following illustration for I/O locations of the GOT715S-RA-M.

No	Function
1	DC for power input with isolated 1.5KV
2	CAN Bus with isolated 1.5KV
3	Audio (Line out, Line in, speaker out)
4	DIO (6 input/2 output with isolated 1.5KV)
5	USB 2.0 x 2(M12, A-coded)
6	COM 2 (RS-232/422/485 with isolated 1.5KV)
7	COM 1 (RS-232/422/485 with isolated 1.5KV)
8	LAN 2 (Gigabit LAN with isolated 1.5KV)
9	LAN 1 (Gigabit LAN with isolated 1.5KV)

1.5 Packing List

When you receive the GOT715S-RA-M, the bundled package should contain the following items:

- GOT715S-RA-M unit x 1
- Phoenix Connector x 1
- Screw M2*3L x 2

If you cannot find the package or any items are missing, please contact Axiomtek distributors immediately.

Section 2 Hardware and Installation

The GOT715S-RA-M provides rich I/O ports and flexible expansions for you to meet different demand. The chapter will show you how to install the hardware. It includes:

- Open back cover
- Serial Ports
- USB Ports
- Ethernet
- DIO
- Audio
- CAN Bus
- DC Power
- Mini card
- LED Indicators
- Auto-dimming

2.1 Open back cover

This section shows users how to open back cover. Please follow the steps below.

Step 1 Unscrew 14 screws on the back cover. Please refer the photo below.

2.2 Serial Ports Interface

This system supports RS-232/422/485 isolated 1.5KV on COM1~COM2 ports. The pin assignments are listed in table below. If you need to adjust these COM ports to work as RS-232/422/485, please refer to BIOS setting in section 3.5.

Pin	RS-232	RS-422	RS-485
1	NDCD	TX-	Data-
2	NRX	TX+	Data+
3	NTX	RX+	No use
4	NDTR	RX-	No use
5	NDSR	No use	No use
6	NRTS	No use	No use
7	NCTS	No use	No use
8	ISO1_GND	ISO1_GND	ISO1_GND

2.3 USB Ports

This system supports two USB ports. The pin assignments are listed in the table below.

Pin	Definition
1	USB1_PWR
2	USB_DN1_C
3	USB_DP1_C
4	GND
5	USB2_PWR
6	USB_DN2_C
7	USB_DP2_C
8	GND

2.4 Ethernet

The GOT715S-RA-M is equipped with two high performance plug and play Ethernet interfaces with X-coded which are fully compliant with the IEEE 802.3 standard. Connection can be established by plugging one end of the Ethernet cable into this RJ-45 connector and the other end to a 1000/100/10-Base-T hub with isolated 1.5KV.

(CN4_LAN1		CN4_LAN2
Pin	Definition	Pin	Definition
1	LAN1_MDOP0	1	LAN2_MDOP0
2	LAN1_MDON0	2	LAN2_MDON0
3	LAN1_MDOP1	3	LAN2_MDOP1
4	LAN1_MDON1	4	LAN2_MDON1
5	LAN1_MDOP3	5	LAN2_MDOP3
6	LAN1_MDON3	6	LAN2_MDON3
7	LAN1_MDON2	7	LAN2_MDON2
8	LAN1_MDOP2	8	LAN2_MDOP2
9	GND_LAN	9	GND_LAN

2.5 DIO

2.5.1 Digital I/O Specification

This system supports one DIO (6 input and 2 output) with isolated 1.5KV. The pin assignments are listed in table below.

Digital Input:

Input channels: 6, sink/source type Input voltage: 0 to 30VDC at 25Hz Input level for dry contacts: Logic level 0: close to ground Logic level 1: open Input level for wet contacts: Logic level 1: +/-3VDC max. Logic level 0: +/- 10VDC min. to +/-30VDC max. (source to digital input)

Digital output:

output channels: 2, sink type output current: 200mA max. per channel on-state voltage:12~ 24VDC nominal max. voltage on COM+: 30VDC

Pin	Definition
1	Common PWR+
2	DI4
3	DI5
4	DO0
5	DO1
6	Common PWR-
7	EXT_POWER
8	D10
9	DI1
10	DI2
11	DI3
12	Isolation GND

2.5.2 Digital I/O Software Programming

- I2C to GPIO PCA9554PW GPIO Group0[5:0] is Input, Group0[7:6] is Output.
- I2C address: 0b0100100x.
- Registers:

Register 0: Input Group0 register.

Table 4.	Register 0	- Input Port	register bit	description
----------	------------	--------------	--------------	-------------

Bit	Symbol	Access	Value	Description
7	17	read only	x	determined by externally applied logic level
6	16	read only	x	
5	15	read only	х	
4	14	read only	х	
3	13	read only	х	
2	12	read only	Х	
1	11	read only	х	
0	10	read only	Х	

Register 2: Output Group0 register.

Table 5. Register 1 - Output Port register bit description Legend: * default value.

Bit	Symbol	Access	Value	Description
7	07	R	1*	reflects outgoing logic levels of pins defined as
6	O6	R	1*	outputs by Register 3
5	O5	R	1*	
4	04	R	1*	
3	O3	R	1*	
2	02	R	1*	
1	01	R	1*	
0	00	R	1*	

2.5.3 Digital Input Wiring

XIN1	
XIN2	SW2
XIN3	SW3
XIN4	SW4
XIN4	SW5
XIN5	SW6
XIN6	\
DIO_GND	

WET contact Logic level 1: +/-3VDC max. Logic level 0: +/- 10VDC min. to +/-30VDC max

2.5.4 Digital Output Wiring

2.6 Audio

This system supports one Audio (Line out, Line in, speaker out) with isolated 1.5KV. The pin assignments are listed in table below.

Pin	Definition
1	SPEK_OUTA+
2	SPEK_OUTA-
3	AUDIO_GND
4	AUDIO_OUT_L
5	AUDIO_OUT_R
6	NA
7	FRONT-JD
8	AUDIO_GND
9	AUDIO_LIN_IN_L
10	AUDIO_LIN_IN_R
11	BUZZER+
12	BUZZER-
13	MIC-JD
14	MIC_IN
15	AUDIO_GND

2.7 CANBUS connector

This system supports one CAN Bus with isolated 1.5KV. The pin assignments are listed in table below.

Pin	Definition
1	NA
2	CAN_LO
3	ISO3_GND
4	NA
5	NA
6	ISO3_GND
7	CAN_HO
8	NA
9	NA

2.8 DC Power connector

The system supports one DC for power input with isolated 1.5KV. The pin assignments are listed in table below.

Pin	Definition
1	PWR_V+
2	PWR_V+
3	PWR_V-
4	PWR_V-
5	ACC

Note 1 : If the testing environment is not able to provide ACC, please shorten the V+ & ACC signal pin of the cable.

2.9 Mini card Installation

2.9.1 Wireless LAN Card Installation

The GOT715S-RA-M provides two Mini card slots for user to install wireless LAN cards. You can choose either slot 1 or slot 2 to install the wireless LAN card and refer to the following.

Step 1 Open the back cover and find out the mini-card slot on main board.

Step 2 Insert the wireless LAN card to the slot and fasten the screws as shown.

Step 3 There are two connectors on wireless LAN card. One is MAIN, and the other is auxiliary. Connect antenna cable to MAIN connector on wireless LAN card.

2.9.2 mSATA Card Installation

The GOT715S-RA-M provides one Mini card slot for user to install mSATA. Please choose the slot 2 for the mSATA card and refer to the following instructions and illustration:

Step 1 Open the back cover and find out the mini-card slot on main board.

Step 2 Insert the mSATA card to the slot 2. Screw it firmly on the slot.

2.10 LED indicators

LED lights make sure that whether the MCU is working properly and facilitating to debug in the phase of research and development. It is not necessarily the actual system mounting LED lights.

Status	Buzzer	Power LED(Green)	LED Yellow	LED Red
Power up	Beep-S	ON	ON	ON
Device working properly	х	ON	OFF	OFF
Over-temperature warning	Beep-S	ON	Blink	OFF
Over-temperature LCD - saving	Beep-S	ON	Fast Blink	OFF
Key pressed	Beep-S	Flash	x	х

The following table summarizes the buzzer and LED indication of the device

2.11 Auto-dimming

Because the human eye perceiving brightness is nonlinear, PWM duty must be set percentage at each stage of opening and closingLCD Backlight:

Level 10 = 100%Level 9 = 91%Level 8 = 82%Level 7 = 73%Level 6 = 64%Level 5 = 55%Level 4 = 46%Level 3 = 37%Level 2 = 28%Level 1 = 19%Level 0 = 10%

Auto-dimming level

Surrounding environment	Light Sensor value	LCD brightness level
Tunnel (0~26 Lux)	0~50 Lux	23%~37%
Indoor (200~300 Lux)	200~300 Lux	72%~80%
Outdoor cloudy (1000 Lux)	1000 Lux	88%~100%
Outdoor sunny (2000 Lux up)	1200 up Lux	100%

This page is intentionally left blank.

Section 3 AMI BIOS Setup Utility

The AMI UEFI BIOS provides users with a built-in setup program to modify basic system configuration. All configured parameters are stored in a flash chip to save the setup information whenever the power is turned off. This chapter provides users with detailed description about how to set up basic system configuration through the AMI BIOS setup utility.

3.1 Starting

To enter the setup screens, follow the steps below:

- 1. Turn on the computer and press <F2> or during the Power On Self Test (POST) to enter BIOS setup, otherwise, POST will continue with its test routines.
- 2. After you press the key, the main BIOS setup menu displays. You can access the other setup screens from the main BIOS setup menu, such as the Advanced and Chipset menus.

If you wish to enter BIOS setup after POST, restart the system by pressing <Ctrl>+<Alt>+ <Delete>, or by pressing the reset button on the system chassis. You may also restart by turning the system off and then back on.

It is strongly recommended that you should avoid changing the chipset's defaults. Both AMI and your system manufacturer have carefully set up these defaults that provide the best performance and reliability.

NOTE Because the BIOS setup software is constantly being updated, the following setup screens and descriptions are for reference purposes only, and they may not exactly match what you see on your screen.

3.2 Menu Bar

Menu Bar	Description
Main	To set up the system time/date information.
Advanced	To set up the advanced BIOS features.
H/W Monitor	To display current hardware status.
Boot	To set up the default system device to locate and load the operating system.
Security	To set up the security features.
Exit	To exit the current screen or the BIOS setup utility.

The top of the screen has a menu bar with the following selections:

Use < or < > or < > key to choose among the selections on the menu bar, and then press < Enter>to get into the sub screen. You can also use the mouse to click your required item.

3.3 **Navigation Keys**

The BIOS setup/utility uses a key-based navigation system called hot keys. Most of the BIOS setup utility hot keys can be used at any time during the setup navigation process. These keys include <F1>, <F7>, <Enter>, <ESC>, <Arrow> keys, and so on.

NOTE Some of the navigation keys differ from one screen to another.

Please check the following table for the function description of each navigation key.

Hot Keys	Description
$\leftarrow \rightarrow$ Left/Right	The Left and Right < Arrow> keys allow you to select a setup screen.
∱ ↓ Up/Down	The Up and Down <arrow> keys allow you to select a setup screen or sub- screen.</arrow>
+– Plus/Minus	The Plus and Minus <arrow> keys allow you to change the field value of a particular setup item.</arrow>
Enter	The <enter> key allows you to display or change the setup option listed for a particular setup item. The <enter> key can also allow you to display the setup sub- screens.</enter></enter>
F1	The <f1> key allows you to display the General Help screen.</f1>
F7	Discard changes.
F9	The <f9> key allows you to load optimal default values for all the settings.</f9>
F10	The <f10> key allows you to save any changes you have made and exit Setup. Press the <f10> key to save your changes.</f10></f10>
Esc	The <esc> key allows you to discard any changes you have made and exit the Setup. Press the <esc> key to exit the setup without saving your changes.</esc></esc>

3.4 Main Menu

When you first enter the setup utility, you will enter the Main setup screen. You can always return to the Main setup screen by selecting the Main tab. System Time/Date can be set up as described below. The Main BIOS setup screen is shown below.

Aptio Setup Utility – Main Advanced Chipset Security	Copyright (C) 2013 American Boot Save & Exit	Megatrends, Inc.
